

# Google Wallet is Now Available for Clarien Debit Card Holders

**Please refer to the below FAQ drafted for your review and feedback.**

Clarien Bank is pleased to announce that Google Wallet is now available for our Mastercard Debit USD and BMD cardholders. When you add a card to Google Wallet, you can make fast, secure payments with Google Pay in-store with your Android phone, and online.

Use Google Wallet to:

- Pay in stores with Google Pay by unlocking your Android phone and holding it near a contactless payment terminal.
- Make online purchases wherever Google Pay is accepted.

## How to Get Started

For Android Phone (Google Wallet app)

Note: At this time, you can only add your Clarien Debit Mastercard®. Clarien Visa Credit Cards are not supported.

### 1. Open Google Wallet App

- If you do not have the Google Wallet app on your phone, download it from the Play Store
- Simply search “Google Wallet” and download it from Google Play.

### 2. Tap ‘Add to Wallet’

### 3. Choose ‘Payment card’ → ‘Debit or credit card’

### 4. Add your card

- Scan your card with your phone’s camera, or
- Enter card details manually (card number, expiry, CVV)
- Agree to the terms and conditions — you’ll need to scroll all the way down until the button changes from ‘More’ to ‘Accept’.

### 5. Choose verification method

**Important:** do not select the Text or SMS options as they do not work in Bermuda

- Tap ‘More options’
- Select the Email option from the list

**Important:** if the email on file is incorrect use the ‘Contact Bank’ option so Clarien can update your records and provide you with the verification code directly through a representative.

- An email will be sent with a verification code, which must be entered into the Wallet app to complete setup.

### 6. Once verified with the code, your card will be added and ready to use.

### 7. Final step

- Make sure NFC (Near Field Communication) is turned on in your phone’s settings before you can tap to pay.

**Enjoy your Google Experience!**
